

M-26 SPINDLE/GEAR E.P. GREASE

Revised 10-1-09

DESCRIPTION

M-26 Spindle/Gear E.P. Grease is a superior quality, lithium base, semi-fluid grease specially formulated for use in lubricating rotary grass cutters and most applications where a semi-fluid or NLGI 00 grade grease is required. M-26 Spindle/Gear E.P. Grease is also excellent for lubricating many gear boxes, which are worn to the point where seals will no longer prevent leakage such as bushhogs and some industrial gear boxes.

COMPOSITION

M-26 Spindle/Gear E.P. Grease is formulated with hydrotreated, 100% paraffin base oils and fortified with the following additives for optimum lubrication in heavy duty applications.

Rust & Oxidation Inhibitors	Anti-Wear Additives	Stabilizing Agents
Friction Modifiers	Extreme Pressure Additives	Oiliness Additives
Adhesive & Cohesive Additives	Silicone	Demulsifiers

APPLICATIONS

Rotary grass cutters, bushhogs, pasture clippers & some industrial gear boxes.

<u>SPECIFICATIONS</u>	
NLGI Grade	00
Thickener	Lithium
Worked Penetration	400-430
Timken Load Rating	65 lbs.
Texture	Smooth, semi-fluid
Copper Corrosion Test	Pass
Rust Test	Pass
Anti-Oxidation	Inhibited
Anti-Wear Treated	Yes
Dropping Point, °F	>300
Pour Point, °F	-40 Max.
Base Oil Viscosity @ 100° F, SUS	100-125
