

M-29 BOOM SLIDE GREASE w/MOLY

Revised 10-1-09

DESCRIPTION

M-29 Boom Slide Grease w/Moly is a superior quality lubricant recommended for lubricating telescopic crane booms and other boundary lubrication applications where sliding or vibrating action pushes the lubricant away from the contacting surfaces. M-29 Boom Slide Grease w/Moly provides optimum protection from wear and fretting and is excellent for applications subject to oscillating or sliding motion.

COMPOSITION

M-29 Boom Slide Grease w/Moly is formulated with premium grade, high film-strength, paraffin base oils, thickened with calcium base, water resistant thickeners and fortified with the following additives to provide optimum positive lubrication for today's high demand equipment.

Rust & Oxidation Inhibitors

Anti-Wear Additives

Molybdenum Disulfide

Adhesive & Cohesive Additives

Friction Modifiers

Oiliness Additives

Extreme Pressure Additives

SPECIFICATIONS

Thickener Type	Calcium
Thickener vol. %	5-6
Base oil @ 100°F, SUS	450
NLGI Grade	1
Worked Penetration	240-250
Dropping Point, °F	210
Timken Load Rating	65 lbs.
