L-621 CABLE LUBRICANT

01/01/18

DESCRIPTION

L-621 Cable Lubricant is a superior quality, multi-purpose cable/wire rope lubricant fortified with molybdenum disulfide and special penetrants for optimum lubrication and hard film protection of heavy duty cables, chains and wire ropes.

COMPOSITION

L-621 Cable Lubricant is formulated with a high quality processed bituminous base and fortified with the most advanced additives on the market today. L-621 Cable Lubricant is blended with special drying agents and solvents to reduce surface tension and allow for greater inner core protection into the cable. In addition, the following additives are included to provide optimum positive lubrication to prolong the life of expensive cables and wire-ropes:

Rust & Oxidation Inhibitors	Anti-Wear Additives	Molybdenum Disulfide
Friction Modifiers	Oiliness Additives	Silicone
Adhesive & Cohesive Agents	Extreme Pressure Additives	Penetrants

APPLICATIONS

L-621 Cable Lubricant is recommended for use on wire-ropes and cables, whether they are hemp, jute, or wire cored, and on link and roller chains. It is recommended for use on derricks, cranes, draglines, guy wiring, and cargo hoists. L-621 Cable Lubricant can be used on virtually any cable that requires lubrication and protection and can be applied by brush, poured manually, or mechanical means such as drip oilers or pressure-fed applicators.

SPECIFICATIONS

Color	Black
Appearance	Tacky/Stringy
Asphalt Content % Wt.	50%
Viscosity @ 100° F, SUS	600
Rust Test	Pass
Flash Point (Liquid)	110°
Anti Wear Treated	Yes
Penetrant Added	Yes
Rust & Oxidation Treated	Yes
